FIGHT AT BILLINGS, MONTANA.

One Deputy Marshal and a Commonwealer Shot and Seriously Wounded-More Trouble Apprehended.

WASHINGTON, April 25.-General Scho field, commanding the army, last night sent a telegram to General Merritt, commanding the Department of Dakota, instructing him, by direction of the President, to have a sufficient force sent to arrest all persons engaged in the unlawful seizure of the Northern Pacific train at Butte, Mont., and to hold the train and all on board until they can be delivered to the United States Marshal of Montana, subject to the orders of the United States District Court.

In the opinion of the government officials, none of the so-called army movements of the unemployed are so formida ble as is the one along the line of the Northern Pacific railroad. The telegrams received here state that bands ranging from 50 to 800 men are congregated along that road, with the avowed intention of coming to Washington, by peaceable means if possible, but by forcibl means if they must. Already one or two trains have been seized, and constant threats are being made of seizing others Attorney-General Olney to-day tele graphed the United States Marshal o Washington to use every means in his power to maintain the peace and the se curity of property, The United States marshals in Montana, North Dakota, and Minnesota had previously been instructed to the same effect, and all of them are directed to promptly notify the Depart ment of Justice the moment they are unable to control the populace,

THE SITUATION. The order of the President for th treops to intercept the Northern Pacific train, and arrest the runaway Hogan contingent was issued solely to command respect for the mandate of the United States Court, and was not in any sense national interference in local affairs. It is explained at the White House that the Butte miners had applied to the Northern Pacific officials (that road being in the hands of government receivers) for free this was refused the strikers broke into the round-house, selzed a locomotive coupled cars to form a train, and when coupled cars to form a train, and where the United States Court granted an in-junction against this action and issued ar-order for the arrest of the marauders and the United States Marshal attempted o execute the orders with as strong a posse as he was able to summon to his oil, his forces were overpowered, and

the stolen train escaped.

TO STOP THE TRAIN.

To STOP THE TRAIN.

This morning it was learned from army officers at Livingston, where the branch road to the Yellowstone Park connects with the Northern Pacific, that the stolen train had passed that point, and through Colonel Swayne, orders were sent to Lieutenant-Colonel John F. Page, commanding Fort Keogh, informing him of the President's orders, and directing him to make arrests, and under no circumstances to permit the train to pass Miles City.

This afternoon, when it was realized that the train might be some time in reaching Miles City, Colonel Page was ordered to make the arrests with as little lelay as possible, and it is not unlikely that he may put troops on a train and rain to-night.

There is some apprehension that Colonel

The officers of the army claim to have paid the railroad company for transportation as far as Brazil, twenty miles east of Terre Haute, but after the loading of horses, wagons, cooking utensils, and blankets, the train pulled out, leaving the Industrials in the city. They spent last night near here, using the railroad company's fences and ties for fuel. One train was side-tracked to prevent the Commonwealers from seizing it.

When the trains were started this afternoon the 300 soldiers made a rush for a freight and captured it. The engineer was told that the Industrials had railroad men in their ranks, and that if he refused to start the train he would be put off, and one of their own men word take the throttle. The trainmen were unable to prevent them from riding, as the Industrials were determined, and any resistance would have resulted in bloodshed.

bloodshed.
Brazil being in the heart of the Indiana coal district, and hundrels of miners being out on strike, there may be serious trouble, as the miners will, on account of being residents, claim the charity of the city in preference to the Industrials.

The members of the army say they will continue to burn the railroad company's fences until their blankets and cooking utensils are brought back to them. The army was desperate last night, and a detail of police surrounded the city.

The authori-ties are being kept fully advised of the movements of the train by the Northern Pacific telegraph operators along the line. The garrison at Fort Keogh consists of 500 men, with a Gatling battery. Colonel Page is in command. The probability is that the leaders will be returned to Butte under military, execut. under military escort.

The shots were quickly returned by the Industrials. A number of shots were exchanged between the parties before Marshal McDermott could regain control of his men. COXEY'S OWN COMMAND.

Which Are Deadly Weapons.

WASHINGTON, April 25.-A special from Frederick, Md., to the Post says: Aside from the excitement in camp this evening there was another incident that was worthy of note, as probably covering one of Browne's deep-laid schemes. He calls it "issuing banners of peace" to the men. It is likely that the Washington authorities would term it making an armed body of the Commonweal. The "banners of peace" are about 5x12 inches, made of cotton, and printed with "Peace on Earth, and Good Will Towards Men." They are neither remarkable nor formidable, but the stocks on which they are carried are fourfoot oak clubs an inch square, and heavy enough to brain a man at a blow. In addition they are to be shod with an iron socket, ostensibly to hold a bayonet, but when 300 men are armed with these weapons they will be a formidable body indeed.

Browne may be perfectly sincere in his was worthy of note, as probably covering

weapons they was indeed.

Browne may be perfectly sincere in his expressed desire for peace, but a smaller token would have been much less expensive than the load of oak. The sticks were only received to-day, and it is thought that the heretofore unexplained lay-over here was to allow time for their manufacture. The man on picket duty around the camp to-night are equipped with the oak sticks.

In his order to-night Browne announces Hyattstown as the slopping place to-

gate several thousand men, but they are morrow, Gaithersburg the following night, and Rockville on Saturday, according to the schedule. Small Pox Following Coxey.

NEW YORK, April 5.—Dr. Alva H. Doty, Chief Inspector, Division of Contagious Diseases, Board of Health, says there is great danger of small-pox being spread all over the country by Coxey's army. He asserts that nothing can prevent the small-pox from being carried from one city to another by Coxey's followers.

Southern Flour for Europe. CHATTANOOGA, TENN., April 25.— A solid train of twenty cars loaded with flour left here this afternoon, the flour being for shipment to Liverpool and Glasgow. Twelve cars go to Port Royal, S. C., and two to Haltimore. This flour is from the Noel mills. The mills about two weeks ago shipped twenty-three cars of flour to Liverpool via Port Royal, me first shipment of flour from a southern port. They now make 2,500 barrels per day for the European trade, and will ship most of it by new route through Port Royal. This makes Chattanooga one of the great flour distributing points

. WILL NOT WEAR TROUSERS.

The Woman of the Future Will Regard the Beautiful.

This is a picture of the woman of the future as drawn by Mrs.. Theodore Sutro, a well-know society leader of New York:

"She will not wear trousers. On the contrary, her garments will be prettier, and she hernelf will be, if that is possible, more effeminate, more gentle and tender than she is now. Why? Because she will realize, by being all these, that her power will be increased in a corresponding ratio. Woman's rights are invariably associated in a man's mind with the loud-voiced woman, the woman without little personal vanities, the woman without little personal vanities, the woman who is indifferent to her appearance, who wears big boots and would like to wear high hats and make other incursions on his wardrobe. He is the reigning power now, and, looking at things from this point of vision, can be blamed for not wanting to abdicate in favor of any one so unattractive to him as this person? There will be more marriages for love in her day than there are now, for the reason that natural selection will replace convenience. She will be qualified for work, and, not fearing it, will not marry for support. She will be able to provide for herself, and when she marries it will be because she loves the man, because he is congenial and sympathetic to her, and will not retard her mental and moral development. She will be fearless and frank, and will have the courage of her convictions." a well-know society leader of New York: "She will not wear trousers. On the con-
